Summary

Artistic Professional with broad experience in the traditional arts, graphic arts, web design, and a diverse background in health related fields. Reputation for managing multiple projects with aggressive deadlines from concept through implementation. Combines creative insight with a practical approach to consistently deliver results on time and budget.

Project Management Skills ♦ CuraGen Corporation

- Managed all aspects of the 2003 Annual Report from conception to ADP stock transfer office delivery. Challenges included selection and creative management of design firms, content coordination, working with unusual design to ensure meeting requirements of mailing weights and practical aspects of envelope stuffing by stock transfer agent, coordination of 10K deliveries, pre- and on-press supervision, and post production distribution to smaller investor agent houses.
- Designed and maintained multiple external web sites for CuraGen and 454 Life Sciences from 2000 to 2004. Coordinated with outsourced firms for career resource sections and investor relations features. Maintained investor contact database, matching investor and scientific materials online through PDFs, web pages and interactive Flash programs, and general maintenance.
- Ensured timely postings of quarterly earnings and press releases, web casts, including managing investor fax, email blasts, and reserved comm lines via conference call provider.
- Designed and maintained 3 versions of corporate intranet, including training over 40 individual web authors and interdepartmental management of content. Built and maintained latest version after collaborating with heads from all departments.
- Assisted with and managed various corporate-wide training meetings on both scientific and corporate topics, including assisting in all employee meetings.
- Concept to implementation of a large number of projects daily, supporting various corporate and conference related activities:
 - Designed, trained and produced interactive auto-starting CD hand outs.
 - Designed and oversaw production of folders for materials.
 - Designed and supervised production of brochures, booklets and collateral sheets.
 - Formatted and designed Power Point presentations.
 - Coordinated technical support for off-site meetings.
 - Designed and coordinated booth and tabletop display graphics.
 - Designed and produced billboards, signs, and posters.
- Provided full support for media requests - both scientific and general.
- Built and managed a prototype Data Analysis (D.A.) Group for quality and high throughput analysis and improvement of gene confirmation group. Group was replicated throughout entire production facility.
